Experience

Front-End Developer & Design Systems Architect at Fellow

July 2018 - February 2019

During a contract with Fellow, I assisted with the development of an Angular based web application and lead the creation of a design system project to document and codify common design patterns and information. I worked with Fellow and their client, the Washington State Auditors Office, to integrate the design system into their existing build processes.

Software Engineer at CommerceHub

July 2016 - June 2018

At CommerceHub I lead the effort to pull front-end code out of a monolithic repository into a separately deployed front-end application which could be deployed quickly and independently from the monolithic application. Separately, I lead efforts to create and maintain a shared React component library and encouraged the creation of a company design system.

Software Engineer & Designer at Dash Platform

January 2015 - June 2016

As a Software Engineer and Designer at Dash Platform, I lead the design and development of the user experience for a large SAAS application. My experience at Dash Platform gave me practice at every level from designing and building interfaces to building REST-ful APIs and storing data in a database.

Web Designer at Pacific Software Publishing

November 2013 - December 2014

At Pacific Software Publishing I designed and built website and email templates alongside working on business to business web applications. I gained extensive experience building responsive experiences with HTML, CSS, and JavaScript and was introduced to version control.

Senior Designer at Acupuncture Media Works

November 2011 - October 2013

At Acupuncture Media Works I worked with a small team of people to provide acupuncture marketing materials for clinics around the world. I designed and built brochures, pamphlets, newsletters, web ads, WordPress templates, and web tools. Here I built design skills along with HTML, CSS, JavaScript, and PHP skills.

Freelance production artist at Super Supplements

September 2011 - November 2011

As a production artist, I would create graphics according to brand guidelines for different mediums. I balanced multiple projects simultaneously and met project deadlines efficiently.

Freelance graphic designer at Puget Sound Energy

August 2011 - June 2014

As an independent contractor for Puget Sound Energy I created and produced graphics for print and web mediums. I set my own schedule and would quickly turn around assignments as they were sent to me.

Skills

Technical

- HTML
- CSS
- JavaScript
- Amazon Web Services
- C#/.NET
- PHP
- SQL
- Git

Design

- Web UI/UX Design
- Design System Architecture
- Adobe Creative Cloud
